**WORLD TERRORIST ACTIVITIES OF THE
ISLAMIC REPUBLIC OF IRAN**

In memory of those who have lost their lives.

We have previously published the relevant information on the Islamic republic of Iran's wide range operational activities to suppress and eliminate its political opponents inside and outside Iran. For example, we have exposed a regime far reaching terror activities outside Iran, more especially the political assassinations carried out by the regime in Iraqi Kurdistan, against the Kurdish and Iranian political parties' members based in Iraqi Kurdistan in the 1990s. However, one area of the terror activities that is not known worldwide is the regime's plans and operations to assassinate the dissidents in Europe and North America. In fact, the Islamic regime has spent billion dollars on payments to recruit Shia and none-Iranian individuals to form terror groups aiming at suppressing the anti-government groups and assassinating the political activists across Europe and North American countries.

What you will see below is a partial list of Iranian dissidents who lost their lives as a result of Islamic regime terror operations that were mainly carried out outside Iran, mainly in European capital cities. This is a partial list of women and men, of all ages, of all types, of all nationalities and ethnic background, who have lost their lives as a result of the Islamic Republic's terror groups operation in Europe. With the exception of only one case, *the Mykonos*, the agents who carried out these missions have never been identified and are still at large. It goes without saying some of the senior officials of the regime who been involved in ordering and executing the assassination of dissidents have never brought to justice.

The political assassination of the political opponents that carried out by agents of the Islamic republic undoubtedly fits into the category of crimes against humanity. The Kurdistan Democratic Party is therefore publishing this list in the hopeful anticipation that the relevant international authorities will take serious steps to bring to justice senior leaders and officials of the Iranian regime who have acted as the principal players of these political assassinations.
